This is a very very powerful series. It will take hold of you in unexpected ways...it did for me. It made changes to my very core. Wonderful changes. I've been taken down another level...a level i didn't know could exist given my current understanding...always thinking i'm as deep as i can possible go. Domina proved me wrong once again. I'm in awe of it all. Stunned actually. When i started this journey, i pursed her files, but now, now i feel LEAD to listen more and more. Somewhere along the way i unknowingly let go of the reigns and Domina took over. These files may be the catalyst for that transition. Embrace it and enjoy the loss of control to a most wonderful woman.

Wonderful series of files. When calculating this against the cost of buying them separately, please keep in mind the sign up to future implant upgrades is also a \$15+ file, making this a huge bargain and we'll worth your time. Definitely worth a pickup and listen to. Highly recommended!
