Even if this is the second part of a series named "collard" you don't need a collar to feel the effect of this file.... well, as long as you decide not to need one. i enjoyed this very much. The volume is a little low, so make sure to use good headphones.

Is there really any other way to go then real submission for this Enchanting Princess? Like the previous one it's a very powerful session where Her sweet alluring voice takes over completely again and at the end all i know is... Yes Princess.. i want to take the next step, Yes Princess.

this one is EROTIC one, it's linked to the first, perfect one for Obedient slaves, it's strong as usual, and it completes the collar stuff so you won't think to take it off, or you will hate doing so if you have to

Princess Shelle tells us this is a very special session for those who want real submission... and it most certainly is. But also a real treat for anyone and everyone who enjoys hypnosis by Princess. Impossible to resist. Impossible not to love. And i love how She makes me feel... and this is strong stuff indeed. Decisions, decisions. Wonderful.

This file is supremely relaxing, i think one of the most relaxing files from Domina Shelle that i own. Having said that, it packs one hell of a punch. The ending leads to a very important decision that should not be entered into lightly, but it can be extremely rewarding and fulfilling.
