I think I fell asleep the first time I heard this, and did not realise its power. I just listened again. I realise that most of the time I am nice and logical. But in reality that is only a small part of me. A much larger part is the illogical demonic side that I keep suppressed. This side has incredible power, and this file unleashes it. Even better it merges this power with the demonic aspect of our normally very sweet princess. This unleashing and merging concludes in a very sexual way that seals our fate. Only this time it is not just the nice conscious part of me that is enslaved, it is also my demonic aspect. In other words the totality of my being. Wow!

pure fantasy file, different than others, unique and dark unrepeated fantasy, can't be done except by a Perfect Princess Shelle

The basic premise of this file has interested me for quite a long time. I finally had the opportunity to listen to it today, and the one thing I should say is that I should have listened to it far sooner. This file from Domina Shelle is one of Her earlier works, but it is fantastic. The audio quality is very good and the person that is able to resist the induction in this file must be made of stone. Highly recommended.
