WOW that was something totally different. Yes, there is shock a treatment. Yes, it did jolt the pre cum right out of me. This file is very arousing. Very sexy and a bit scary with the thought of a trigger that Lady Helena places in you. To be all honest, i would love to be in Her Chamber and feel this with Her present. i bet that would be an experience to remember. Of course, i will never forget what this one

felt like anytime soon. This file is a solid 5 stars.

i've tried a few of Lady Helena's files over the last few months, but had always stayed away from this one, even though tempted. just like Domina Shelle, Lady Helena has a very addictive voice and so eventually i gave in that temptation. I'm so glad I did. this is such an overpowering experience, where it will leave you I won't say except that you'd better be a good little slave after listening. if you want to see how much control Lady Helena really has then you must try this.

Domina instructed me to listen to this file. It is not for beginners. Lady Helena is very powerful, and my body responds to her directions like a puppet.

Lady Helena installed a very powerful trigger within me in this session. One that She can give me pleasure but also a painful shock which ensures that i do not want disobey Her. Be aware as the trigger gives Her full control over mind and body... so She can give you pleasure yes, but also knock out your whole body while all you muscles are cramping and the only thing you feel is agony. Still i love to have Lady Helena has this power over me as She needs to have that control in the role of Domina's Enforcer.

Domina commanded that I listen to Lady Helena's file. I didn't know what to expect and felt very nervous - but Domina has clearly taught her well. I don't know what I was expecting - but I feel incredibly deep and had a very intense experience - one that left me afraid of the consequences of disobedience. Domina Shelle has already trained me to crave the pleasure of obedience, so it's only fitting for Lady Helena to teach me the fear of disobeying. I strongly recommend this session for anyone craving something a little bit more on the cruel side - or any slave who wants yet another reason to be perfectly obedient!

This was a good idea and nicely executed. It plays with this pain and pleasure territory that is still very new to me. Lady Helena's calm voice always makes me little worried but it works well with this long slow fall into hypnosis.

Well i don't really now what to say about this one, at the beginning i was on the edge, a little anxious about what might happen and i did had a hard time to let go, but that only was until i heard her whisper sleep, there i just got lost, gone, not caring for anything anymore, except to listen to her Voice, i had alot of different feelings thoughtout this File, simple pleasure, pleasure that made me throb, shivers and tingles everywhere, but pain? i did not felt any pain, but i am not even sure if i was supposed to feel any, i do know that if i disobey i should feel pain, the problem is i can't tell if it works or not, i would need to test it out and well i surely will not, why would i want to disobey on purpose? That makes no Sense, so i guess i have to wait until i mess up someday and then i should now if it works or not? i am so confused now >.
