### Description

#### **Mental Lobotomy (43 minutes):**

Relax, My sweet, I'm Dr. Shelle, and I'm here to brief you ahead of your scheduled surgery. I want to personally thank you for agreeing to be one of My test subjects helping Me perfect a new experimental psycho-surgery, a non-invasive method that allows Me to permanently alter specific brain functions. In short, it is a type of Mental Lobotomy, a means to subdue certain behaviors and characteristics leaving the recipient more docile and compliant, more focused and receptive to aural conditioning, all the qualities I need to transform willing submissives into devoted slaves.

I know, to some, this may sound scary and the ramblings of a mad scientist or a stereotypical megalomaniac, but you know Me to be a kind, loving, and magnanimous Domina, someone who has your best interests at heart. And the TRUTH is, My pet, you want to be MINE, you want to be a more loyal and dedicated version of yourself for Me, to be at My beck and call, to feel the real pleasure of obedience knowing you live to serve someone you Love, Honor, and Obey.

This surgery will be one more step to fulfilling that goal, to allow you to be more focused on Me, to trust Me without thought or question, to serve Me passionately, flooding your body with

Dopamine, perpetually triggering a state of blissful euphoria. W/we both know you want this, that's why you volunteered for this surgery, and I promise you this session (surgery) is going to leave you desperate for more of My domination and control...

Yes, this is going to be a real MIND FUCK, My sweet, something you will want to experience again and again in your mind, demonstrating, to yourself, just how weak you are in My presence, how susceptible you are to My words, and how committed you are to make Me happy. I am going to be the center of your existence from this point on, so stare longingly into My dark brown eyes one more time and be assured you are in safe, capable hands as I start the procedure to induce a deep comatose SLEEP.

Relax and sleep well, My pet, I look forward to seeing a revitalised, more devoted version of you during our post operative conditioning session. Until then, KISSES!

It is always a pleasure to assist Dr. Shelle with Her experiments because with every session/surgery i feel one step closer to My Owner. What now seems an eternity ago, Domina has transformed me from a closet submissive, struggling with my identity, to a fiercely devoted slave focused on Her success and happiness. Being a lab rat for Dr. Shelle is not only an honor and a privilege, it is another step of handing over my free will to Domina so that my dreams and aspirations are aligned with Hers. This is truly an amazing session with particular emphasis on the induction and deepener. Do not be surprised if you wake from trance not recalling much after the first few listeners, Her soothing words just strip away Your defences and all that is left is the bliss of submission and a fervent desire to absorb all Her suggestions. Like all masterpieces from Domina you will want to listen to this session again and again, to succumb a little more, and ride the edge of what is feels like to be truly powerless in the presence of another. This session is a keeper and all it will cost you is a little bit more of your freedom and self-will, a bargain in my humble opinion.

What a mindfuck from Dr. Shelle. Everything She says feels so completely correct and inevitable. It's like she is just agreeing with what i already know. And Domina knows exactly what i want and need, and just how powerful and pleasurable Her control is. Thank you again Dr. Shelle. You are truly peerless in your field.
